以下の符号は、その属名。

属名には必ずこの一語の符号

を併記することを示す。

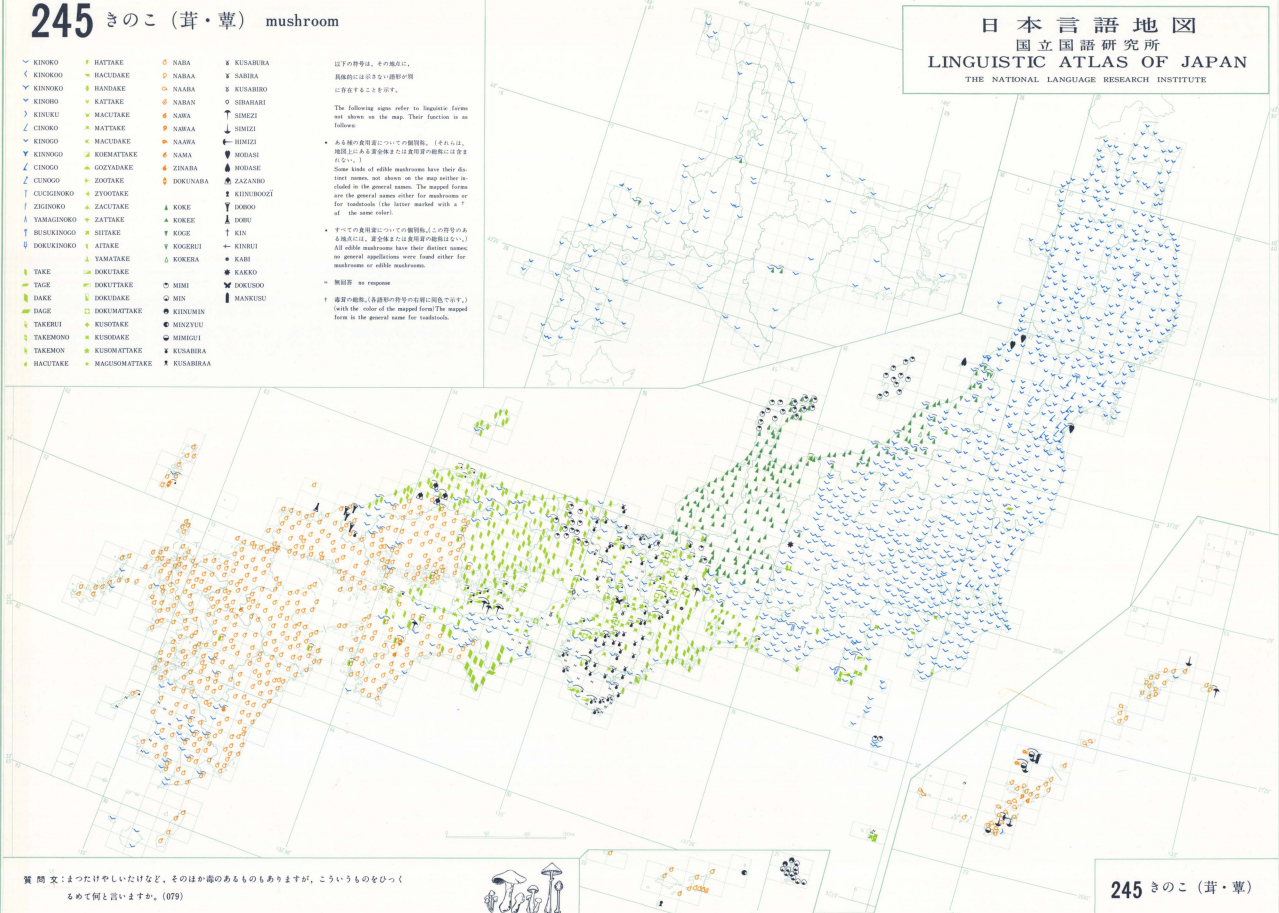

The following signs refer to linguistic forms not shown on the map. Their function is as follows:

● 本種の属名についての個別語。(そのらは、地図上にある集合体または属名語の総称には含まれない。)  
 Some kinds of edible mushrooms have their distinct names, not shown on the map neither included in the general name. The mapped forms are the general name either for mushrooms or for mushrooms. (The latter marked with a \* of the same color.)

● すべての属名についての個別語。(この符号のある属名には、集合体または属名語の総称は無い。)  
 All edible mushrooms have their distinct names, no general appellations were found either for mushrooms or edible mushrooms.

○ 無回答 no response

† 属名の総称。(本語別の符号の右側に併記を示す。)  
 (accl) the color of the mapped form) The mapped form is the general name for mushrooms.

質問文：まつたけやしいたげなど、そのほか毒のあるものもありますが、こういうものをひく  
 るので何と言いますか。(079)
